Education

Bachelor in Physics

University of Bucharest

2022 - 2025

Highschool Diploma

"Barbu Stirbei" College

2018 - 2022

Languages

English

French

About Me

Introduction

Front-End Engineer specialized in React and TypeScript with experience building scalable design systems and AI-powered features. Strong background in component-driven architecture, GraphQL APIs, and experimentation-driven product development. Passionate about AI-augmented workflows.

Experience

SOFTWARE ENGINEER INTERN

March 2024 - May 2024

CREATOPY

- Modernized application settings by integrating the MUI-based Creatopy Design System using React (TypeScript) and styled components.
- Improved UI consistency, usability, and maintainability through reusable, accessible component patterns.
- Collaborated with senior engineers to align implementation with industry-standard frontend architecture.
- Earned a full-time offer based on performance and technical contributions.

FULL-STACK ENGINEER

CREATOPY

May 2024 - Present

- Designed and developed AI-powered features by integrating OpenAI APIs, enabling automated design generation from URLs, assets, and templates.
- Led the implementation of a custom image model feature using the Exactly.AI API, enabling users to train brand-specific models and generate on-brand content.
- Built and scaled the Creatopy 2.0 Design System using React and TypeScript, establishing reusable, component-driven architecture across the platform.
- Implemented state management solutions in React (Redux/Context API) to manage complex UI state and asynchronous data across large component trees.
- Integrated REST and GraphQL APIs within a microservices-based architecture, ensuring secure and performant communication between frontend applications and backend services.
- Improved frontend performance and reliability through optimized React rendering patterns, lazy loading, and scalable UI architecture used by real users at scale.
- Collaborated with Product, UX, and engineering teams to deliver AI-powered features for enterprise customers.

Programming Languages

- TypeScript
- JavaScript
- SQL
- Python

Technical Skills

- React.js
- Node.js
- GraphQL
- REST API
- Redux
